

Dr. Filler is an engineer with diverse industry and academic experience. I hire him when forensic engineering is required. His tenacity, attention to detail, and critical thinking provide an uncanny sense of truth from the evidence. These qualities lend themselves well to cause and origin investigations – along with cases requiring standard of care analysis. Jurors relate well to Dr. Filler’s testimony. His plaintiff, insurance and corporate defense experience is highly regarded within the legal profession. I recommend Dennis unequivocally and will hire him again.
